Date of final well closure: If any of the above questions have a no response, site does not qualify for archival.

DISCUSSION/RATIONALE FOR ARCHIVAL:

This site is one at which the Superfund program conducted an inspection for EPA's RCRA program during the period from 1990 to 1994. This site is referred to as an Environmental Priority Initiative (EPI) site, and the inspection (EPI-PA) conducted for the RCRA program was entered into the CERCLIS data base so resource use could be tracked. This site has never been (nor is it now) the subject of investigation by the EPA's Superfund program except as part of the EPI program.

The only Remedial or Removal activity indicated in CERCLIS is the EPI-PA. No other Remedial or Removal interest is indicated. This site is designated as "Deferred" to RCRA and has a Final Strategy Determination indicating no further Superfund interest.
